THE PROBLEM

How Migrations Work Today

01 🏢 **End Client**
Identifies need, issues RFP, evaluates vendors

02 💼 **Sales & Scoping**
Discovery calls, needs analysis, proposal writing, SOW negotiation

03 🏗️ **Solutions Architecture**
Schema analysis, gap assessment, AS-IS → TO-BE mapping, BRD creation

04 👥 **Resource & Team Build**
Find offshore/onshore devs, onboard, ramp up on client systems

05 ⚙️ **Implementation & Config**
Data migration, custom development, integrations, UAT, bug fixing

06 🚀 **Go-Live & Handover**
Cutover planning, validation, training, hypercare, documentation

Month 0 — 2 – 6+ months typical — Month 6+

INTRODUCING

Source

An AI engine that automates 80% of ERP migrations —
so your consultancy wins more deals, moves faster,
and makes more money.

THE SOLUTION

Source AI Replaces the Delivery Chain

BEFORE

End Client → Sales → ~~Solutions Architect~~ → ~~Offshoring~~ → Migration Complete

AFTER

END CLIENT

QuickBooks

→

YOUR CONSULTANT

- Relationship
- Sales & scoping
- Provides context
- Reviews outputs

→

SOURCE AI ENGINE

Altius Group
NETSUITE CONSULTING · MUNICH · 35 CONSULTANTS

"We quoted €14K fixed-price and delivered in under three weeks. Our old model would have been €35K over four months with an offshore team. Source handled the technical execution — we kept the client relationship and made 50%+ margins."

Managing Director
ALTIUS GROUP

THE TEAM

Built by AI engineers.

A team with deep ERP domain expertise and production AI systems experience.

San Francisco, CA

CORE TEAM

Liam Fuller

CEO

Built Source's autonomous migration engine. AI infrastructure & multi-agent systems.
